**Statement by Great Neck Water Pollution Control District Re:  
Signing of InterMunicipal Agreement with Town and Village of Great Neck**

**(Great Neck, NY)**- The Great Neck Water Pollution Control District has come to an agreement with the Village of Great Neck for the construction of a new District facility that will treat both the District and Village flows. The agreement was reached late Thursday morning. The Board of Commissioners voted and unanimously passed the motion to approve the signing of the IMA at their 2PM meeting. The District has been working tirelessly on this agreement, solely funding the design of the new facility and looks forward to its culmination and the benefits it brings to the Great Neck community. Construction for the new facility is planned to start September 2009 with a final completion date of December 31, 2011.
